

The **PATH** to becoming an
APPLICATION DEVELOPER

by: Jayson Nacional
Associate Software Engineer

“The art of programming is the art of
organizing complexity.”

-Edsger W. Dijkstra

WHAT it is???

and the MYTHS around it...

Application development is the process of creating a computer program or set of programs to perform the different tasks that a business requires.

- ✗ I have to master mathematics to learn programming languages.
- ✗ I must be a genius
- ✗ I have to go to university to learn to code.

..myths continuation

- ✗ I must learn only the best language.
- ✗ It only takes weeks to learn and master a programming language
- ✗ I should memorize all syntaxes
- ✗ I am woman. I can't code
- ✗ I can only start making money once I have mastered programming

Quick Demo

STEPS

Decide which type of training is right for you

Choose the best major/degree for your goals

Get an internship in a tech-related field

Consider earning certifications

Build Valuable Job Experience

Never stop learning

“Measuring programming progress by lines of code is like measuring aircraft building progress by weight.”

-Bill Gates

Q&A
